

# AI-Powered Multi-Disease Diagnosis Report

Report ID: 114def40-a15d-465f-8ef4-6caf27beaad2  
Generated: 2026-07-18 18:50:27 UTC

## 1. Patient Information

|                     |                                      |
|---------------------|--------------------------------------|
| Full Name           | Maya Patient                         |
| Patient ID          | 725992ac-15ec-4d07-854b-58625ce9c810 |
| Age                 | 32                                   |
| Date of Birth       | 1994-05-12                           |
| Sex                 | Female                               |
| Gender              | Woman                                |
| Blood Group         | O+                                   |
| Phone               | +1-555-0104                          |
| Email               | patient-0e6507c8@example.com         |
| Address             | 42 Clinical Lane, Boston, MA, USA    |
| Emergency Contact   | Ava Patient / +1-555-0199            |
| Registration Date   | 2026-07-18 18:50:02 UTC              |
| Last Profile Update | 2026-07-18 18:50:04 UTC              |

|                     |                                |
|---------------------|--------------------------------|
| Medical Information | No chronic illnesses reported. |
|---------------------|--------------------------------|

## 2. Diagnosis Information

|                       |                         |
|-----------------------|-------------------------|
| Disease Name          | Diabetes                |
| Diagnosis Result      | Negative                |
| Result Status         | Not Detected / Low Risk |
| Prediction Confidence | 55.4%                   |
| AI Trust Score        | 79.1%                   |
| Diagnosis Date        | 2026-07-18 18:50:22 UTC |
| Model Name / Version  | xgboost / artifact v3   |
| Input Modality        | Tabular                 |

### 3. Medical Input Data

|                          |         |
|--------------------------|---------|
| Age                      | 30.000  |
| Bmi                      | 32.400  |
| Bloodpressure            | 72.000  |
| Diabetespedigreefunction | 0.385   |
| Glucose                  | 117.000 |
| Insulin                  | 126.000 |
| Pregnancies              | 3.000   |
| Skinthickness            | 29.000  |

### 4. AI Explainability

|                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| SHAP Analysis        | <pre>{"available": true, "mean_abs_value": 0.46586740802394044, "feature_importance": [{"feature": "Glucose", "importance": 0.087337}, {"feature": "BMI", "importance": 0.04252}, {"feature": "Pregnancies", "importance": 0.034533}, {"feature": "Insulin", "importance": 0.017297}, {"feature": "DiabetesPedigreeFunction", "importance": 0.009533}, {"feature": "SkinThickness", "importance": -0.005691}, {"feature": "Age", "importance": 0.004533}, {"feature": "BloodPressure", "importance": -0.003069}]}</pre> |
| LIME Analysis        | <pre>{"available": true, "rules": [{"5 &lt;= -0.72", -0.1821113332316037}, {"-0.75 &lt; 1 &lt;= -0.15", -0.1429543139984597}, {"6 &lt;= -0.76", -0.09804793843951465}, {"7 &lt;= -0.82", -0.0906848625572756}, {"8 &lt;= -0.07", -0.06086307767896658}, {"-0.20 &lt; 4 &lt;= -0.14", 0.0512865849539346}, {"9 &lt;= -0.21", -0.03112810391283838}, {"-0.70 &lt; 2 &lt;= -0.02", 0.024781018606410396}, {"12 &lt;= -0.12", -0.021488029677578655}, {"0 &lt;= -0.87", -0.015844855243983047}]}</pre>                      |
| Grad-CAM             | The current image artifact is a flattened-pixel baseline without a convolutional layer, so spatial attribution is not available.                                                                                                                                                                                                                                                                                                                                                                                        |
| Integrated Gradients | The current image artifact is a flattened-pixel baseline without a convolutional layer, so spatial attribution is not available.                                                                                                                                                                                                                                                                                                                                                                                        |
| Important Factors    | <pre>{"feature": "Glucose", "importance": 0.087337}; {"feature": "BMI", "importance": 0.04252}; {"feature": "Pregnancies", "importance": 0.034533}; {"feature": "Insulin", "importance": 0.017297}; {"feature": "DiabetesPedigreeFunction", "importance": 0.009533}; {"feature": "SkinThickness", "importance": -0.005691}; {"feature": "Age", "importance": 0.004533}; {"feature": "BloodPressure", "importance": -0.003069}</pre>                                                                                     |

### 5. Recommendations

The AI result does not currently indicate diabetes. Continue routine monitoring, maintain preventive care, and consult a qualified clinician if symptoms persist or worsen.

**This AI-generated report is intended for preliminary screening and decision support only. It is not a substitute for professional medical diagnosis, clinical examination, or treatment. Patients should consult a qualified healthcare professional for confirmation and medical advice.**

## 6. Blockchain Verification

|                           |                                                                                                                                                                                                                                                                                                   |
